

## **LOU AND JUDI FRIEDMAN**

When Beyond Nuclear was just an idea, Lou and Judi Friedman were there to lend their support, inspiration and enthusiasm. This never wavered, and, as Beyond Nuclear Board Chair and Beyond Nuclear Launch Partner respectively, both contributed enormously to shaping Beyond Nuclear in its early years. They were also very generous donors.

Judi and Lou, who were 80 and 81 respectively when they died in 2016, were educators, humanitarians, peace envoys, parents and grandparents as well as friends and colleagues to many. Both worked tirelessly to help build Beyond Nuclear into what it is today. In addition, Judi founded and ran People's Action for Clean Energy in their home state of Connecticut.
